

SHUBHAM BANSAL

shubhamaryanbansal02@gmail.com | +91 8527586157 | [GitHub](#)

Seasoned Mobile App Developer with around 5 years of exp in building complex apps in Flutter, Android & iOS

Skills

Languages: Dart, Kotlin, Java, Swift

Courses: Data Structures & Algorithms, OOPs

Tools: Android Studio, Xcode, BitBucket, GitHub, Postman, API Manager Azure, JIRA, PlayStore & AppStore

Technology & Framework: Bluetooth Low Energy, IoT, Flutter, Android, iOS, SDK & Plugin Development, RESTAPI's & Firebase Services Integration, Riverpod, Cubit & Bloc, SQLite

Organizational Experience

- TVS Motor Company, Bengaluru** | Software Development Engineer II **July'23-Present**
Responsibilities:
 - ❖ Developed **Custom Bluetooth Low Energy library** in Android and Swift for 3rd party Integration. Implemented the same in our flutter apps **as a plugin**.
 - ❖ Solely responsible for architecture, development and release of [TVS HLX Connect](#), an app live in over 30 countries across Africa, which has complex features such as **connecting to an IoT device** securely to immobilize the vehicle and upgrading the device's firmware (**OTA DFU**), theft alert detection, supporting 5+ languages and much more, which is powered by our **custom made BLE plugin** which supports both android & iOS.
 - ❖ Integrated Flutter-based screens into existing native [TVSConnect](#) app, the organization's flagship app with a global user base exceeding millions.
 - ❖ Optimized the [TRUCHAMP](#) app by implementing **Feature-First Architecture** using Riverpod and minimizing APK size, fixing memory leaks, refactoring and modularizing code, improving test code coverage, and resolving existing lint issues.
 - ❖ Re-architected the UI with Material Design and improved BLE connectivity by **reducing connection time** with the vehicle and synchronizing error handling in the 3W [APNAA TVS app](#).
- TagBox Solutions, Bengaluru** | Software Development Engineer I **June'21-July'23**
Now acquired by [TVS](#)  [TVS Motor Company](#)
Responsibilities:
 - ❖ Worked closely with the CTO, hardware and business teams to come up with new apps targeting **Supply Chain Logistics and Connected Vehicles**.
 - ❖ Product owner and lead developer for the flagship application used by **25+ live enterprise customers** TagSync flutter app. Constructed utilizing **Bloc** state management technology and Clean architecture.
 - ❖ Responsible for development of **SmartBike** BLE based **native iOS and Android apps**. These apps are being used by the end customers of an **automotive giant across 5 countries**.
 - ❖ Re-architected the TagLink Android App with Clean architecture, Material UI and improved performance using **Retrofit** network library with JWT based Authentication mechanism.
 - ❖ Responsible for **publishing the apps on PlayStore & AppStore**.
 - ❖ Implemented firebase services in app such as **Firestore, Firebase Auth, Remote Config, Crashlytics & Analytics**.
 - ❖ Incorporated features into applications, such as **running the app in background** for a longer period of time, coded **AES algorithm for encryption**, pagination, temperature graphs, push notifications, implementing In-App-Update prompt, handling application's permissions cleanly & much more.

Contact: - Sameer Singh (CTO, TagBox) - +919620647577

Achievements & Certifications

- **Won Spot Award at TagBox** in recognition of outstanding work and effort
- **Won Codeathon** held by Github at Microsoft office
- **Rated 5-Star** in Problem Solving and Java at HackerRank platform.

Education

BITS Pilani (M.Tech) in Software Engineering, specializing in Software Product Management **2024 – 2026(Expected)**
Dr. A.P.J Abdul Kalam Technical University (B.Tech) in Computer Science Engineering **2016 - 2020**

Personal Projects

- Tekation Flutter App** **Nov'22-Present**
 - ❖ It's an institute-based app that details the services provided by them, including the technical courses they provide, when the workshop will be available for a demo, and much more.
 - ❖ Solely built and deployed the app on PlayStore and AppStore, following DDD architecture using Riverpod.
